

STAND-UP AND TRANSFER-AID

model vita lift

Stand-up and transfer-aid

This stand-up- and transfer-aid provides freedom and self confidence. Independent standing up from bed and chair possible by means of remote control.

This stand-up- and transfer-aid for home or institution and care area, supports activation and mobilisation in one. Through compact construction ideal for use in small spaces.

Patients can be moved directly to bath tub, toilet or bed and back in standing position without heavy lifting from wheelchair. The electric leg spreading enables the close proximity of the wheelchair to the foot plate.

The belt and knee supports are cushioned for safe patient transport. Jib and knee supports are individually adjustable. Two rotatable hand grips fixed on the ensure additional safety.

The footrest can be folded up for persons still able to walk with support, but not able to stand up on their own. High degree of independence and safeguarding of private sphere made possible through included remote control.

A sling two part in one is optional available for standing position of patients with minimal mobility left.
